Peter A. Zink, Ph.D.

A BUILDER

- Woodworking & construction
- Electro-mechanical systems
- Device development

A PROBLEM SOLVER

- Taking things apart to understand how they work
- Putting things together to explore new ways of doing

Career Journey

SCIENTIFIC STUDY & RESEARCH

Physics, Materials Science & Engineering

- Developed fuel cell cathodes
- Scrap metal refining reactor
- Nuclear waste recycling sensor

TEACHING & BUILDING

Boston University, Mechanical Engineering

- Taught Product Design, CAD, Manufacturing & Automation, Machine Design et al.
- Built Automated Design & Manufacturing Lab

ADVANCED MANUFACTURING

PTC, Director, Education Programs

- Collaborated with global faculty to support adoption of CAD, Industrial Connectivity, AR and Robotics Integrations in manufacturing education

ENTREPRENEURSHIP

Metric Devices, Founder / CEO

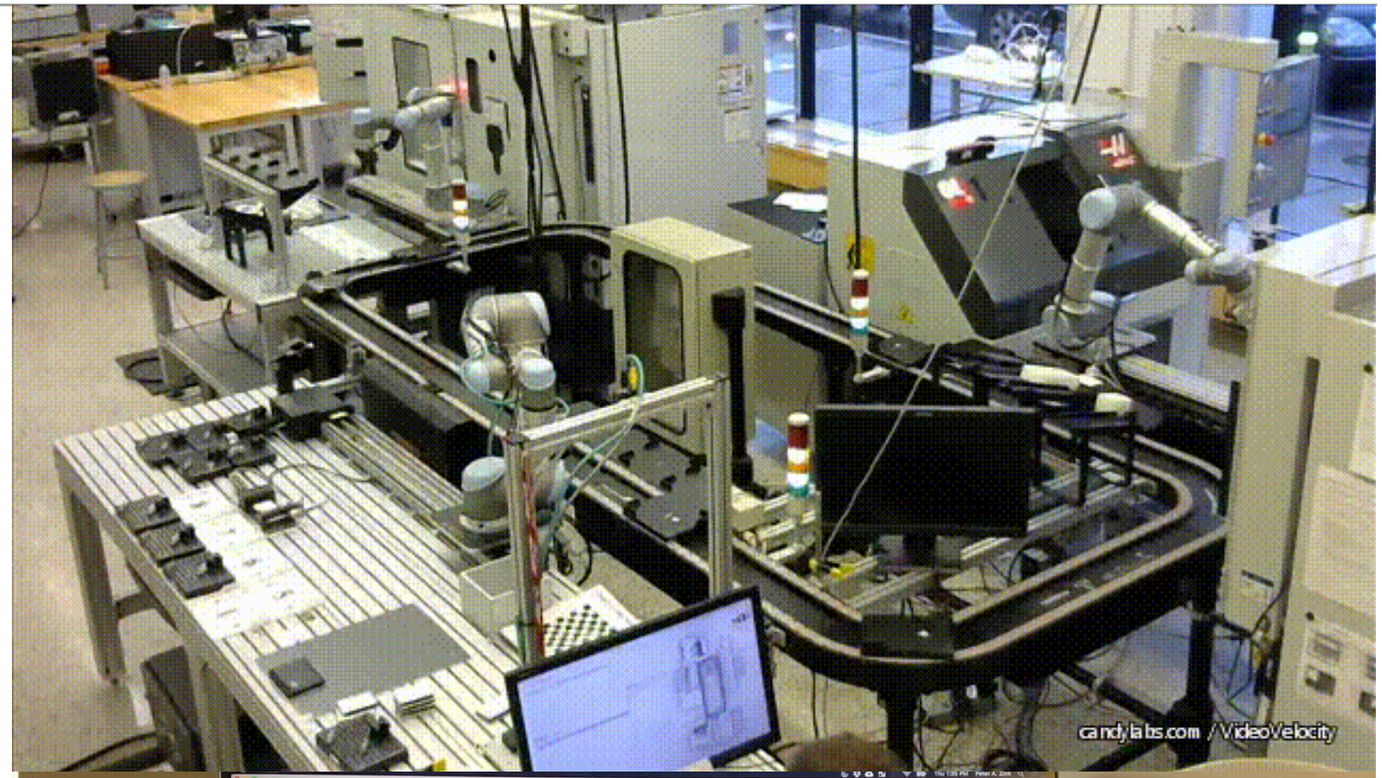

- Developed and manufacture the Splayometer

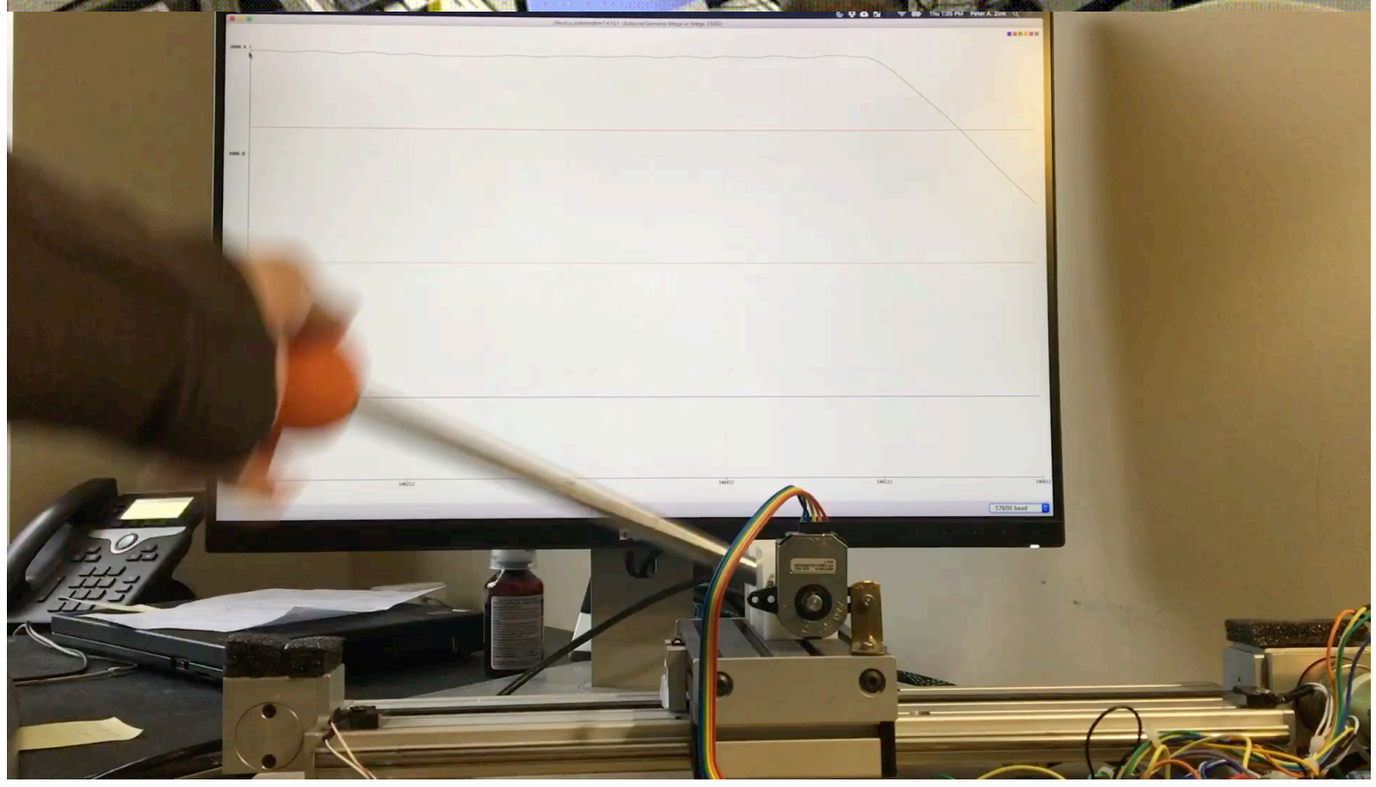

Experience: Automated Design & Manufacturing Lab

- **Engaged students** in experiential learning with flexible manufacturing cell

- **Provided complex technical challenges** in using new and old equipment

- **Gained broad range of competencies** in industrial robotics, linear drives, closed loop control, vision systems, automated storage, custom EOAT, force sensing and other manufacturing systems

Experience: The Splayometer

- **Leveraged rapid prototyping** to share early models with therapists
- **Collected customer input** to inform design decisions
- **Created editable work instructions** to ensure consistency and quality
- **Used CAD+PDM** to track design changes and ensure OTS components fit
